🇬🇧 ROUND TABLE: INTERNAL DEVELOPER PORTALS (IDP'S)

Choices, challenges and successes; an in-depth discussion on IDP's

TARGET GROUP

Product owners, Lead Developers, Architects

PROGRAM

09:30   Welcome and introductions
09:45   Discussion and sharing setups
11:45   Round up and closing

LOCATION

Rabobank, Croeselaan 18, 3521 CB Utrecht

PREPARATION

Prepare for what you want to share about your setup

Rabobank

The use of Internal Developer Portals (IDPs) is a fast-growing topic within the broad DevOps field. In addition to the benefits (improved developer experience, faster delivery and more autonomy), there are also challenges.
How does your organization deal with:

- Opting for open standards and modular architecture? (e.g. Backstage as a framework)
- Integration issues? (CI/CD, observability, secrets management, etc.).
- Do developers really use the portal?
- Internal communication, training and support to ensure that the IDP lands well?
- Implementing AI?

Rabobank has opted for Backstage and would like to exchange experiences, lessons learned and ideas with organizations that also use an IDP (be it Backstage or a similar product).

Join this session for an interactive and in-depth discussion; share your setup, show your solution and learn from your peers.

CAPACITY

The maximum number of participants for this session is 15 participants.
