IT Circle NEDERLAND

MARCH 12TH, 2026
14:30 - 17:00

WORKSHOP: EU AI ACT IN PRACTICE

A practical workshop to learn about the EU AI Act and put it into practice for your organization.

TARGET GROUP

AI systems developers, compliance officers, risk managers, product owners, and AI governance leads

PROGRAM

14:30	Arrival
15:00	Theory
15:50	Tea/Coffee break
16:00	Breakout sessions
16:30	Plenary
17:00	Drinks

LOCATION

TU Delft, Mekelweg 5, 2628 CD Delft

SPEAKER

Maria Rudneva
TU Delft

TUDelft

EU AI Act in Practice: High-Risk Classification Workshop (Art. 6 + Annex III)
In 2026, the EU AI Act is no longer an abstract document on a Chief Compliance Officer's desk. It is becoming a concrete set of expectations and requirements that will shape how organizations design, deploy, and govern AI systems in day-to-day operations. For high-risk systems, compliance obligations begin before market placement and misclassification is the most expensive error.

In practice, the compliance effort is driven largely by a system's intended purpose and your role in the value chain (e.g., provider or deployer) - all starting with getting the risk classification right.

This workshop focuses on one thing - classification. We'll translate Article 6 and Annex III into a practical workflow you can apply to your organization's AI portfolio. The second half is interactive: we will classify several use cases, document the rationale and compare outcomes to improve consistency and auditability.

Key outcomes
- Build a practical decision flow to classify AI use cases under the EU AI Act
- Understand the two routes to "high-risk" (Article 6) and escape clauses
- Document a clear classification rationale that can be reused in internal governance processes
