- 17:00 Drinks

LOCATION

Avelingen-West 20, 4202 MS Gorinchem
Please be aware: the Damen Shipyard is not easy to visit by public transport.

From ERP Integration to an Agentic Organization – and Making It Work in an Agile Way

The digital backbone of many organizations runs on ERP. But how do you ensure successful integration of (SAP) ERP tooling within complex application landscapes? And more importantly: how do you incorporate AI in a way that truly creates value and helps your organization become smarter, more autonomous, and future-ready?

During this session, Damen Shipyards will present how they tackle two closely connected challenges:

Topic 1

Successful Integration of (SAP) ERP in Large Application Landscapes – with AI

- Which architectural choices make the difference between simply connecting systems and truly integrating them?
- How do you embed AI in a way that adds value to processes, decision-making, and operations?
- And how do you evolve toward an Agentic organization?

SPEAKERS

Brigitte de Leeuw
Han Coenraad
Kenny van Sleuwen
Damen Shipyard

Topic 2

How Do You Make This Work Within an Agile Way of Working?

- What does ERP and AI integration require from your product structure and team setup?
- How do you prevent Agile delivery from clashing with enterprise architecture and compliance requirements?
- Which rhythms, roles, and governance structures enable scalable change?

We will complete the afternoon with a tour of the Shipyard.

Who Should Attend?

This session is designed for CIOs, IT and enterprise architects, Agile leaders, product owners, and transformation professionals working in complex environments who are looking to effectively align ERP, AI, and Agile delivery.

What You Will Gain

- Insights into key success factors and common pitfalls.
- Inspiration on how to strategically connect technology, AI, and Agile delivery.
- The opportunity to exchange experiences with peers.
- An exclusive tour of the Damen shipyard in Gorinchem.

Are you working on the next step in your digital and Agile transformation?

Join us and contribute to the conversation on how we move from system integration to organizational intelligence.

CAPACITY

This session has a maximum capacity of 40 participants.
